

A close-up photograph of a young woman with dark hair pulled back, wearing blue medical scrubs and a stethoscope. She is smiling warmly at the camera. In her left hand, she holds a white tablet computer. The background is a blurred clinical setting. The image is framed by a blue bar at the top and a green bar at the bottom.

## Expert in **e-Consultation** and **Tele-Medicine**

As you know technology is affecting our  
lives in a big way

# Health Tablet – ‘Can maintain complete EMR of Patients’

As you know technology is affecting our lives in a big way. Slowly & slowly we have become so much dependent on it that life without gadgets seems impossible. With the launch of the first truly portable, user friendly and user experience rich tablet, a revolutionary device in terms of mobile computing, working of healthcare sector has absolutely revolutionized. The ability to gather and access information with the touch of a fingertip, and carry it around wherever you go is invaluable for those working in this sector and a trend that is transforming the industry. The biggest use of tablets is driven by the fact that patients feel the need to stay in touch with their healthcare providers including doctors, nurses, pharmacists and health plan administrators at all times. We have combined the power of a Smart phone or a Tablet with a personal health record platform that brings disparate data together in a secure environment and have brought out.

## Prescription Pad

Electronic prescription software increases patient's satisfaction by improved communication standards and saving time

Prescription Pad is India's most trusted and widely used prescription writing medical software. The software makes the life of both the doctors and patients easy, comfortable, and organized by arranging all the health and medical parameters in one place and disseminating them as and when required. Here are some of the most vital features of Prescription Pad.

A new Prescription would take even less than 2 minutes to complete.

### A Glance of the Software:

- Contains complete prescribing information of more than 70,000+ brands of Indian, British & American Pharmaceuticals drug database
- Contains full monograph of nearly 3,000+ drugs (generic drugs). These drug's indications, contraindications, precautions, side effects, dosage & mode of action are also described separately in point wise manner that it takes just a minute to see any detail about the drug.
- Complete diagnostic information, differential diagnosis & treatment protocols of more than 1,500 diseases & details of 700 Investigations other than the drug database.
- Ability to check for drug safety at individual disease level also like in case of G6PD(40 drugs contraindicated), PORPHYRIA ( 223 drugs contraindicated ), HYPERTENSION, COPD etc. as there are scores of medicines which are contraindicated in these various conditions.

- Automatic downloading of related investigations once you write diagnosis of the patient in the software so that you need not waste time in thinking about it. Any investigation in this list can be deleted or added later before giving out the prescription to the patient.
- Ability to give you tips regarding treatment protocol in case a patient is simultaneously suffering from two or more diseases like Diabetes with Hypertension or COPD with Heart failure.
- You have complete pharmacology on your desk top and see details of the drug from anywhere while you are writing prescription without leaving the screen.
- Facility to take print-outs of patient records, day-to-day income & accounts, medical certificates and other.

### For Pediatricians

- Complete vaccination schedule for children with automatic reminder letter generation facility.
- All kinds of growth charts & developmental mile stones tables are available.

### For Gynecologists

- Facility to keep complete obstetric record of a female patient along with automatic calculation of expected date of delivery on entering the last date of menstruation.
- Automatic treatment alerts are given by the software if pregnancy is associated with any interfering disease like diabetes mellitus, hypertension, and hypothyroidism.
